

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

English [S1MwT1>JAng1]

### Course

Field of study

Mathematics in Technology

Year/Semester

1/1

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

full-time

Requirements

elective

### Number of hours

Lecture

0

Laboratory classes

0

Other (e.g. online)

0

Tutorials

60

Projects/seminars

0

### Number of credit points

3,00

### Coordinators

mgr Alicja Wegwerth-Kurpiewska

alicja.wegwerth-kurpiewska@put.poznan.pl

### Lecturers

### Prerequisites

Update: 21.06.2023 1. The already acquired language competence compatible with level B1 (CEFR) 2. The ability to use vocabulary and grammatical structures required on the high school graduation exam with regard to productive and receptive skills. 3. The ability to work individually and in a group; the ability to use various sources of information and reference works.

### Course objective

1. Advancing students' language competence towards at least level B2 (CEFR). 2. Development of the ability to use academic and field specific language effectively in both receptive and productive language skills. 3. Improving the ability to understand field specific texts (familiarizing students with basic translation techniques). 4. Improving the ability to function effectively on an international market and on a daily basis.

### Course-related learning outcomes

Knowledge:

As a result of the course, the student is able to

•ought to acquire field specific vocabulary related to the following issues: describing graphs, mathematical terms and symbols, mathematical operations, matrices, mathematical functions, differential

calculus;

•is familiar with appropriate linguistic grammatical structures and uses them effectively in written and oral utterances.

Skills:

As a result of the course, the student is able to

•express basic mathematical operations and to interpret data presented on graphs/diagrams;

•formulate a text in English where he/she explains/describes a selected field specific topic.

Social competences:

As a result of the course, the student is able to

•retrieve information on his/her own from field specific texts in English;

•communicate effectively in a field specific/professional area and on a daily basis;

•recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: in-class evaluation ( tests, quizzes )

Summative assessment: credit

### Programme content

Update: 21.06.2023

Topics: describing graphs, mathematical terms and symbols, mathematical operations, matrices, mathematical functions, differential calculus.

### Course topics

none

### Teaching methods

New vocabulary practice, e.g. pronunciation practice, speaking activities, e.g. students' dialogues, conversations, discussions, written tasks, matching definitions, multimedia activities.

### Bibliography

Basic

Krukiewicz-Gacek, A./ Trzaska, A. 2012. English For Mathematics. Kraków: AGH

Additional

Kucharska-Raczunas, A./ Maciejewska, J. 2010. Mathematics For Students Of Technical Studies. Gdańsk: Wydawnictwo Politechniki Gdańskiej

### Breakdown of average student's workload

	Hours	ECTS
Total workload	75	3,00
Classes requiring direct contact with the teacher	60	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	15	1,00
