POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Basic of electric systems in means of transport [S1Trans1>PUEwŚT]

Course			
Field of study Transport		Year/Semester 2/3	
Area of study (specialization)		Profile of study general academic	;
Level of study first-cycle		Course offered in Polish	
Form of study full-time		Requirements compulsory	
Number of hours			
Lecture 15	Laboratory classe 0	es	Other (e.g. online) 0
Tutorials 0	Projects/seminars 0	5	
Number of credit points 2,00			
Coordinators		Lecturers	
dr inż. Ryszard Mańczak ryszard.manczak@put.poznan.pl			

Prerequisites

Student has basic knowledge of mathematics and physics

Course objective

Getting to know the basic of theoretical and practical of the operation of DC and AC circuits as well as the construction and operation of selected electrical machines.

Course-related learning outcomes

Knowledge:

The student has extended and in-depth knowledge of physics useful for formulating and solving selected technical tasks, in particular for correct modeling of real problems.

The student has ordered and theoretically founded general knowledge in the field of key issues of technology and detailed knowledge in the field of selected issues in this discipline of transport engineering

Skills:

Student is able to make a critical analysis of the functioning of transport systems and other technical

solutions and to evaluate these solutions, including: is able to effectively participate in the technical inspection and assess the transport task from the point of view of non-functional requirements, has the ability to systematically conduct functional tests.

The student is able to design elements in the field of transport engineering and construct simple machines.

Social competences:

The student is aware of the importance of knowledge in solving engineering problems, knows examples and understands the causes of malfunctioning transport systems that have led to serious financial and social losses or to serious loss of health and even life.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows: Exam at the end of the semester.

Programme content

Basic of DC electric circuits (basic concepts, linear and nonlinear elements, Ohm's law, Kirchhoff's laws, methods of circuit solving, work, power, energy).

Basic of electric circuits of alternating current (basic concepts, generating alternating current, Ohm's law and Kirchhoff's laws, vector and time graphs, work, power, energy).

Transformers - structure and operation.

Electric motors - structure and operation.

Measuring instruments and electrical measurements.

Course topics

none

Teaching methods

Auditorium lecture

Bibliography

Basic

1. Opydo W.: Elektrotechnika i elektronika dla studentów wydziałów nieelektrycznych, Wydawnictwo Politechniki Poznańskiej, Poznań, 2012.

2. Opydo W., Kulesza K., Twardosz G.: Urządzenia elektryczne i elektroniczne. Przewodnik do ćwiczeń laboratoryjnych, Opydo W., Kulesza K., Twardosz G, Wydawnictwo Politechniki Poznańskiej, Poznań, 2004.

Additional

1. Bogdan Miedziński: Elektrotechnika. Podstawy i instalacje elektryczne, Wydawnictwo Naukowe PWN, Warszawa 1997.

2. Praca zbiorowa: Vademecum elektryka. COSiW.SEP.Warszawa.2005

Breakdown of average student's workload

	Hours	ECTS
Total workload	50	2,00
Classes requiring direct contact with the teacher	15	1,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	35	1,00
