Prerequisites

KNOWLEDGE: The student has basic knowledge of the basics of construction SKILLS: The student is able to obtain information from the indicated sources and analyze engineering activities undertaken SOCIAL COMPETENCES: The student is aware of the need to constantly update and supplement construction knowledge and take responsibility in professional work The student is aware of the issues of standardization in construction

Course objective

The student's acquisition of basic knowledge and skills in legal regulations in standardization as well as the process of concluding contracts and negotiations

Course-related learning outcomes

Knowledge:

1. Are able to obtain information from literature, databases and other properly selected information sources; can integrate the obtained information, interpret and evaluate it as well as draw conclusions, formulate, justify, discuss and present opinions
2. Can classify building facilities and elements of technical fitting of buildings

3. When formulating and solving problems in sustainable building engineering, they can notice their systemic and non-technical aspects

Skills:

1. Know building legislation, Polish standards (PN) and European standards (EN), technical conditions of constructing building facilities and energy-saving buildings
2. Have basic knowledge of land planning and energy planning, relations between architecture and urban planning, technical and economic potential of building engineering as well as the effect of building investment on the built sustainable environment
3. Have basic knowledge of the design of general infrastructure constructions as well as sustainable road and rail transport

Social competences:

1. Are able to adapt to new and changing circumstances, can define priorities for performing tasks defined by themselves and other people, acting in the public interest and with regard to the purposes of sustainable development
2. Can realise that it is necessary to improve professional and personal competence, understand the need and opportunities of continuous learning (Master and PhD studies, post-diploma studies, trainings)
3. Understand that it is necessary to protect the intellectual property and are ready to obey the principles of professional ethics

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lectures:

- a written test

Test, grade scale determined% from:

90 very good (A)

85 good plus (B)

75 good (C)

65 sufficient plus (D)

55 satisfactory (E)

below 54 insufficient (F)

Programme content

Managing and managing the construction process and conducting the investment process in terms of contracts and negotiations: normalization and legal aspect, preparation of contracts, practical aspect of negotiation, negotiation with contractor
