

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Time and team management [N2Elenerg1>ZCiL]

Course

Field of study

Electrical Power Engineering

Year/Semester

2/4

Area of study (specialization)

Electric Energy Exploitation

Profile of study

general academic

Level of study

second-cycle

Course offered in

Polish

Form of study

part-time

Requirements

elective

Number of hours

Lecture

10

Laboratory classes

0

Other

0

Tutorials

0

Projects/seminars

0

Number of credit points

1,00

Coordinators

dr inż. Rafał Mierzwiak

rafal.mierzwiak@put.poznan.pl

Lecturers

Prerequisites

The student has basic knowledge of the humanities. He also has basic skills in analysis and searching for information for the purposes of professional practice. The student recognizes the importance of organizing own work as a component of effective functioning in professional and social environment.

Course objective

The aim of the course is to acquire knowledge and skills in the field of proper organization of tasks over time. As a result of its implementation, students will acquire the ability to create their own effective and efficient system of organizing tasks in the context of professional and non-professional work.

Course-related learning outcomes

Knowledge:

1. the student has basic knowledge necessary to understand social, economic, legal and other non technical conditions of engineering activity, including the principles of sustainable development within the conducted subject, especially in relation to management sciences.
2. the student has basic knowledge of management, including quality management and conducting business activity in the field of environmental engineering within the conducted subject.

3. the student knows the general principles of creating and developing forms of individual entrepreneurship, using the knowledge of environmental engineering within the conducted subject, especially in relation to time management issues.

Skills:

1. the student is able to obtain information from literature, databases and other appropriately selected sources, also in english or another foreign language considered to be the language of international communication in the field of environmental engineering; he or she can integrate information obtained, interpret it, as well as draw conclusions and formulate and justify opinions.
2. the student is able to interact and work in a group, assuming different roles in it, and is able to determine appropriate priorities for realization of tasks defined by him/her or others; especially in relation to time management issues.
3. the student has the ability to self-study; he/she understands the need for lifelong learning.

Social competences:

1. the student is aware of the responsibility for making decisions concerning the subject matter of the course.
2. the student is prepared to think and act in an entrepreneurial way.
3. the student is aware of the social role of a technical university graduate, is prepared to formulate and convey information and opinions on technical achievements and other aspects of engineering activity in a commonly understood way.
4. the student is aware of the need to maintain ethical standards resulting from the social role of a technical university graduate.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

Conditions for passing this course are as follows:

- 1) preparation of final essay concerning the marketing strategy of the company - 50 points are possible to obtain.
- 2) test consisting of closed and open questions - 50 points are possible to obtain.

The passing threshold: obtaining at least 50 points including the final essay and the test.

Programme content

The characteristics of modern time management conditions. Elements of praxeology in task organization. Contemporary concepts and methods of time management. Time management system based on the concepts of 7 effective action habits. Methods of planning and scheduling activities. Methodology of network thinking in project planning. Selected problems of forecasting. Goal management. Kaizen philosophy.

Course topics

Introduction

- o Introduction to the course topics

- o Overview of the course objectives and benefits of participation

Characteristics of contemporary determinants of time management

2 Contemporary determinants of time management

- o Technology and its impact on time management

- o Organisational culture and its importance

- o Work flexibility and remote working

- o Challenges of globalisation

- o Stress and information overload

3 Discussion: What determinants affect time management in your organisations?

- o Exchange of experiences and observations of participants

- o Identification of common challenges

Elements of praxeology in task organisation

4 Praxeology in time management

- o Introduction to praxeology

- o Activity analysis as key to efficiency
 - o Examples of application of praxeology in daily work
- Contemporary concepts and methods of time management
- 5 Modern concepts of time management
- o GTD (Getting Things Done) methodology
 - o Pomodoro Method
 - o Energy management techniques
- Activity planning and scheduling methods
- 6 Planning and scheduling of activities
- o Planning tools (e.g. calendars, task management applications)
 - o Techniques for creating effective schedules
 - o Examples of good practice
- Network thinking methodology in project planning
- 7 Network thinking in project management
- o Introduction to network thinking
 - o Application of network thinking in project planning
- Selected forecasting problems
- 8 Forecasting problems in time management
- o Common forecasting problems and errors
 - o Techniques to improve forecasting accuracy
- Goal management
- 9 Goal management
- o Techniques for setting and managing objectives (SMART, OKR)
 - o The importance of clear goals in time management
- Kaizen philosophy
- 10 Kaizen philosophy in time management
- o Introduction to the Kaizen philosophy
 - o Principles of continuous improvement
- Summary and conclusion
- 11 Class summary and conclusions
- o Discussion of key points
 - o Exchange of reflections and experiences of the participants
 - o Answers to questions

Teaching methods

Lecture: informative lecture - multimedia presentation illustrated with examples given on the board.

Breakdown of average student's workload

	Hours	ECTS
Total workload	25	1,00
Classes requiring direct contact with the teacher	10	0,50
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	15	0,50
