POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

COURSE DESCRIPTION CARD - SYLLABUS

Course name Swimminig [C_CS>Pły30]

Course			
Field of study		Year/Semester	
Technical Physics		1/2	
Area of study (specialization) Air Transport Safety Unmanned Aerial Vehicles Technical Electrochemistry Composites and Nanomaterials Air Traffic Organisation Aircraft Piloting Aircraft Engines and Airframes Onboard Systems and Aircraft Prop Organic Technology Polymer Technology null	pulsion	Profile of study general academic	>
Level of study first-cycle		Course offered in Polish	
Form of study full-time		Requirements elective	
Number of hours			
Lecture 0	Laboratory classe 0	S	Other 0
Tutorials 0	Projects/seminars 0	;	
Number of credit points 0,00			
Coordinators		Lecturers	
mgr Waldemar Olejniczak waldemar.olejniczak@put.poznan.p	bl		
mgr Agata Ostrowska agata.ostrowska@put.poznan.pl			

Prerequisites

No health contraindications to physical exercise and swimming. Ability to swim with elementary technique, hold on to deep water, dip the body under the water surface, perform any jump from the edge of the pool. General knowledge and interest in swimming issues.

Course objective

Organizational activities. Regulations of the course. Conditions for passing the semester. Dissolution. Test of skills. Exercises, games and games familiarizing with the water environment,. Exercises fun and games shaping elements of swimming technique. Exercises and games for those who can swim. Dorsal style. Teaching NN, RR work and coordination of NN work, RR with breathing, starts and turns. Freestyle. Teaching the work of the NN, RR and coordination of the work of the NN, RR with breathing, starts and turns. Classical style. Teaching the work of the NN, RR and the coordination of the work of the NN, RR with breathing. Butterfly style. Teaching the work of NN, RR and coordination of the work of the work of NN, RR with breathing Practical credit - 50 m in backstroke and freestyle - evaluation of technique and time.

Course-related learning outcomes

The student acquires the ability to behave in an aquatic environment,

Submerging the head, opening the eyes underwater, breathing,

lying on the chest and back, sliding on the chest and back.

-coordination of arm and leg work in backstroke kraul.

-straight backstroke in backstroke kraul.

-starting from the water for the backstroke kraul.

-coordination of arm and leg work and breathing in the backstroke kraul.

-straight backstroke in breaststroke kraul.

- headlong water jump.

-coordination of arm work, leg work and breathing in classic style.

-jumping into the water and turning in classical style.

The student is able to swim 50 m in each of the learned styles

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Active participation in program activities and demonstration of knowledge resulting from the content of the program implemented in each semester.

Demonstration of the ability to swim with four techniques including starts and turns over a specified distance with notation of time.

Demonstrate theoretical knowledge of the issues implemented during the course of the subject.

Programme content

Back technique Butterfly technique breaststroke technique Swimming using a swim board Swimming with the use of fins Exercises to improve strength and endurance in the water Underwater breathing exercises Exercises using swimming balls Swimming competitions and water games.

Course topics

Exercises, fun and games to familiarize yourself with the aquatic environment. Fun exercises and games developing elements of swimming technique. Exercises and games for those who can swim.

Backstroke. Teaching legs, arms and work coordination

arms with breathing, learning starts and turns.

Freestyle. Teaching the work of legs, arms and work coordination

with breathing, learning starts and turns.

Classic style. Teaching footwork, arm movement and work coordination with breathing.

Butterfly style. Teaching the work of legs, arms and work coordination with breathing

Practical examination – 50 m backstroke and freestyle – assessment technique and time.

Teaching methods

Teaching methods - based on practical action of students, demonstrative, verbal. Synthetic, analytical, comprehensive method. Play method - imitative, play - classical. Lecture - multimedia presentation.
