

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

Profile of study

general academic

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Climbing [C CS>Wsp30]

Course

Field of study Year/Semester

Technical Physics 1/2

Area of study (specialization)

Air Transport Safety Unmanned Aerial Vehicles **Technical Electrochemistry** Composites and Nanomaterials Air Traffic Organisation

Aircraft Piloting

Aircraft Engines and Airframes

Onboard Systems and Aircraft Propulsion

Organic Technology Polymer Technology

null

Level of study Course offered in

first-cycle Polish

Form of study Requirements

full-time elective

Number of hours

Lecture Laboratory classes Other 0

Tutorials Projects/seminars

0 0

Number of credit points

0,00

Coordinators Lecturers

mgr Agata Ostrowska agata.ostrowska@put.poznan.pl

Prerequisites

The student has no health contraindications to active participation in the class Ability to move at height Equipped with appropriate climbing shoes and sports attire

Course objective

Basics of climbing without belay (bulldering) - insertion, three support points, traverses, frog position, use of twists, moving on a cross, reset Moving on straight walls, slants, overhangs and in the roof Degrees of difficulty - markings of ballads and climbing routes. The use of colored holds. Learning how to belay: safety conditions, putting on a harness and clipping in a rope, basic knots used in climbing (e.g. figure eight or double figure eight), securing the climber and the belayer, basic commands - "I can go", "give a block" or "give a pit", choosing a rope, falling off the wall, going downhill Climbing "on the rod" Static and dynamic ropes - unfolding, hanging and retracting after completing exercises.... Exercises - techniques of the climber's use (frog position, use of twists, moving on the cross, limbering and stretching exercises, formation of climber's strength and endurance, games in teaching climbing (such as flood or dokładanka) Climbing competitions - scoring Climbing "with a pit" - safety conditions, teaching how to make a pin, spotting, issuing and selecting a rope, belaying

Course-related learning outcomes

Knowledge of occupational health and safety regulations when using a climbing wall Belaying skills

Knowledge of basic and advanced climbing techniques

Knowledge of flexibility exercises

The ability to develop a climber's strength and endurance

Fun in teaching climbing

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Completing the course is achieved through active and regular participation in classes.

Two absences are possible without the obligation to make up or justify 30 hours per semester.

The student is obliged to make up for remaining absences and short-term sick leave in consultation with his/her teacher.

It is possible to complete two classes a week.

You can participate in physical education classes no more than once a day.

Classes must be made up on a day other than the scheduled classes.

Programme content

Learning belaying
Exercises - techniques of the climber
Flexibility and stretching exercises
Shaping the climber's strength and endurance
Games in teaching climbing

Course topics

Health and safety regulations regarding activities on the climbing wall Basics of climbing without belays (bouldering):

- -insertion
- -three support points
- -traverses
- -frog position
- -use of twisted pairs
- -moving on the cross
- reset

Moving along straight walls, sloping walls, overhangs and in the roof

Difficulty levels - markings of canopies and climbing routes

The use of colored grips.

Learning how to belay: safety conditions, putting on a harness and attaching a rope, basic knots securing the climber and the belay person

basic commands - "I can go", "give me a block", or "let me go down", choosing a rope, falling off the wall, sliding down

Climbing the Fishing Rod

Static and dynamic ropes unfolding, hanging and rolling up after completing the exercises... shaping the climber's strength and endurance fun in teaching climbing

Climbing competition – scoring

Climbing "downhill" - safety conditions

spotting, issuing and selecting the rope, belaying

Teaching methods

- verbal description
- -show
- practical exercises

Bibliography

"Climbing Training" by Eric J. Hörst

"Training planning in sport climbing" by David Macià Paredes

Breakdown of average student's workload

	Hours	ECTS
Total workload	30	0,00
Classes requiring direct contact with the teacher	30	0,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	0	0,00
