POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

COURSE DESCRIPTION CARD - SYLLABUS

Course name Diploma seminar [S2IBio1-UMiR>SD]

/ear/Semester 2/3 Profile of study general academic Course offered in
Profile of study general academic Course offered in
Course offered in
Polish
Requirements compulsory
Other 0
ecturers

Prerequisites

Students should have basic knowledge covering key issues in the field of the first cycle biomedical engineering.

Course objective

Exchange of opinions and assessments on researches carried out as part of the diploma dissertation and on issues related to the course of studies applicable during the diploma examination. Familiarizing students with the process of editing a diploma thesis, ongoing supervision over the progress of the theses. Developing the ability to present the results of one"s own work.

Course-related learning outcomes

Knowledge:

Students have extented knowledge from the scope of biomedical engineering and on the integration scientific and technical information on the borderline of different research fields. Students know the basic tools for carrying out scientific research in the field of biomedical engineering.

Skills:

Students are able to obtain and properly utilise information from literature to solve problems formulated in master"s theses.

Students are able to prepare and present a consise oral presentation in Polish on the results of one"s own studies.

Students are able to prepare and present an oral presentation in Polish on specific issues of biomedical engineering.

Students can properly utilise non-technical aspects for solving problems of biomedical engineering. Students are able to plan and carry out experiments, computer simulations, interpret the obtained results and draw conclusions.

Social competences:

Students is able to widen the knowledge by scientific literature research, exchange acquired informations with the research team. Students think and work creatively. Students can set priorities aimed at realising scientific problems.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows: Completion of the course with a numerical grade on the basis of papers on the progress of students" own research and selected issues in the diploma examination. A minimum of 50% of the points is required.

Programme content

Topics of diploma theses carring out by students, questions for diploma exam.

Course topics

Presentation of issues related to the diploma theses and discussion . Elaboration and presentation of the diploma exam issues related to the field of study.

Teaching methods

Multimedia presentation

Breakdown of average student's workload

	Hours	ECTS
Total workload	75	3,00
Classes requiring direct contact with the teacher	45	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	30	1,00
