

#### POZNAN UNIVERSITY OF TECHNOLOGY

#### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

#### **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

Indoor cycling / Rowing machine [C CS>RS15]

Course

Field of study

Chemical and Process Engineering

Area of study (specialization)

Bionics and Virtual Engineering

**Technical Electrochemistry** Production Informatics and Robotics

**Production Informatics** 

Engineering of Implants and Prosthesis

Construction Engineering and Management

Composites and Nanomaterials

Machine Design

Structural Engineering

Supply Chain Logistics

Corporate Logistics

Metal and Plastics Materials

**Nanomaterials** 

Aircraft Piloting

Aircraft Engines and Airframes

**Logistics Systems** 

Onboard Systems and Aircraft Propulsion

**Production Systems** 

Organic Technology

Polymer Technology

Medical and Rehabilitation Devices

Virtual Engineering

Managing Enterprise of the Future

**Enterprise Resource and Process Management** 

Integrated Work Safety Management

null

Level of study

first-cycle

Form of study full-time

Year/Semester

1/1

Profile of study general academic

Course offered in

Other

0

Polish

Requirements

elective

**Number of hours** 

Lecture Laboratory classes

Projects/seminars

**Tutorials** 15

Number of credit points

0,00

0

#### Coordinators

mgr Katarzyna Wasielewska katarzyna.wasielewska@put.poznan.pl

mgr Agata Ostrowska agata.ostrowska@put.poznan.pl

#### Lecturers

mgr Arkadiusz Jarentowski arkadiusz.jarentowski@put.poznan.pl

### **Prerequisites**

no contraindications

### Course objective

Classes on a rowing ergometer enable endurance training that evenly engages all major muscle groups and improves the efficiency of the cardiovascular system. In addition, they support fat burning and increase the body's ability to absorb oxygen. The natural rowing movement allows you to harmoniously shape the muscles of the legs, back, shoulders, buttocks, arms and abdomen, while improving the functioning of the circulatory and respiratory systems. These classes have a great impact on improving health and instill in the trainee the desire to continue caring for their own health and physical and mental condition. Exercise bike classes are one of the forms of aerobic training. Classes are held on Spinner Pro Plus and Shwinn Evolution bikes. They are conducted by qualified instructors to the rhythm of carefully selected music, which helps maintain the appropriate driving rhythm. The classes consist of three parts: warm-up (consisting of riding at a leisurely pace, preparing for further riding), the main part (consisting of continuous riding with variable pace and load) and the final part (the so-called cool-down, during which we slow down the rotational movement and calm the body after intense driving). During typical classes that last approximately 75 minutes, participants burn up to 800 calories, increase physical and mental strength, and improve endurance. They also reduce the risk of cardiovascular diseases. The benefits of cycling to music include: increasing general efficiency and improving fitness increasing the efficiency of the circulatory system prevention of coronary heart disease and hypertension increasing the efficiency of the respiratory system strengthening the skeletal system prevention of osteoporosis change in body composition mental relaxation:)

### Course-related learning outcomes

The student is able to correctly set the equipment according to its parameters
Knows the rules of warm-up and aerobic or anaerobic training
It can estimate your fitness level based on your heart rate
Performs calming and stretching exercises independently
Adjusts the difficulty of tasks to individual needs
Is able to make an objective self-assessment in relation to the requirements set for himself

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Completing the course is achieved through active and regular participation in classes.

One absence is allowed without the obligation to make up or justify it for 15 hours per semester.

The student is obliged to make up for remaining absences and short-term sick leave in consultation with his/her teacher.

It is possible to complete two classes a week.

You can participate in physical education classes no more than once a day.

Classes must be made up on a day other than the scheduled classes.

#### Programme content

Getting to know the equipment, adjusting the settings to your own body parameters Learning the technique
Conducting a warm-up
The use of equipment to develop motor skills - strength and endurance
Using your heart rate to determine your physical activity level

# Course topics

Rules for the safe use of a rowing ergometer

Setting the equipment according to body parameters

Technique of riding on a rowing ergometer

General endurance training

Special endurance training

Heart rate measurement and physical load

Harmonious shaping of the muscles of the legs, back, shoulders, buttocks, arms and abdomen

Training with a variable pace

Group competition

Rules for safe use of an exercise bike

Setting the equipment (saddle and handlebar) according to body parameters

Stationary bike riding technique

Learning the warm-up (riding at a leisurely pace, preparing for further riding), the main part (continuous riding with variable pace and load) and the final part (so-called calming down and calming down the body after intense work. Maintaining an appropriate riding rhythm.

# **Teaching methods**

practical methods: practical exercises,

reporting methods: description and explanation with underlining most often

mistakes made

exposing methods: demonstration, error analysis

#### **Bibliography**

ERGOMETER CONCEPT II USER'S GUIDE

Cycling.Training basics Dominik Lau

# Breakdown of average student's workload

	Hours	ECTS
Total workload	15	0,00
Classes requiring direct contact with the teacher	15	0,00
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation)	0	0,00
