POZNARO POZNAR

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Operational Research and Econometrics [S2IZarz1>BOiE]

Course

Field of study Year/Semester

Engineering Management 1/1

Area of study (specialization) Profile of study

Enterprise Resource and Process Management general academic

Level of study Course offered in

second-cycle Polish

Form of study Requirements full-time compulsory

Number of hours

Lecture Laboratory classes Other

15 15 0

Tutorials Projects/seminars

15 0

Number of credit points

4,00

Coordinators Lecturers

dr inż. Andżelika Libertowska andzelika.libertowska@put.poznan.pl

dr Tomasz Brzęczek tomasz.brzeczek@put.poznan.pl

Prerequisites

algebra rules, basics of probability theory and statistics, operaiting skills in Excel and its formulas

Course objective

Learning to plan and make quantitative and other decisions using methods of constrained optimization. Learning methods of economic relations estimation and applications.

Course-related learning outcomes

Knowledge:

- 1. Student knows typical problems of operation management, analyzes and solves tasks [P7S_WG_02].
- 2. Knows graphical method and simplex for linear programming [P7S WG 04].
- 3. Knows chosen optimization methods for multicriteria problems, graphs and networks solving [P7S WG 08].
- 4. Knows statistics used to assess decisions and risk, knows rules used under uncertainty [P7S WG 02].

5. Knows ordinary least squares method, its assumptions, properties and applications [P7S_WG_03].

Skills:

- 1. Student can solve optimization tasks using Excel Solver add-in [P7S UW 01; 03].
- 2. Understands idea of graphical method and simplex algorithm [P7S UW 04].
- 3. Can identify multi criteria decision tasks and problems that are solved with graph theory [P7S UW 06].
- 4. Can optimize decision under risk and limit the level of risk [P7S UW 06].
- 5. Can estimate econometrics model, can assess significancy, goodness of fit and analyse results. In particular estimates costs model due to quantity of one or many products and sales trend [P7S UW 02].

Social competences:

Is able to persuade mangement practicioners to benefits of optimization and modelling usage [P7S KK 01-02; P7S KO 01].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Partial assessment:

- a) at lecture the modelling and classifing study of optimization case is assessed,
- b) at tutorial there is intrasemester assessment of tasks solving and theory answering.
- c) at laboratory current outcomes are assessed

Final grade:

- a) at lecture results from whole semester course test including open and closed questions about theory and problems to be analysed.
- b) at tutorial solving tasks from topics of second half of semester
- c) at laboratory a group of 2 students use Solver to find out the optimum solution of a case.

Programme content

The program covers the following issues: linear programming, programming under risk, programming under uncertainty, multi-criteria problems, and econometric model parameter estimation.

Course topics

- 1. linear programmes (LP) formulation: product assortment, blending problem, transportation and transshipment, multiperiod scheduling, using of Excel add-in Solver
- 2. linear programming. simplex, graphical methods, sensitivity analysis,
- 3. transportation and transshipment problem, balanced, unbalanced supply-demand,
- 4. descrete multigoal tasks and methods, multigoal optimality, ranks, optimization degree, AHP,
- 5. decisions under uncertainty and risk: strategies, news boy, decision tree, spare parts stock,
- 6. estimation of an econometric model with ordinary least squares, assessment of significancy and goodness of fit, and forecasing and forecast expected error calculus.

Teaching methods

lecture focused at problem, tutorial in solving tasks, case study

Bibliography

Basic:

Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,00
Classes requiring direct contact with the teacher	45	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	55	2,00
