# POZNAN UNIVERSITY OF TECHNOLOGY

#### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

# **COURSE DESCRIPTION CARD - SYLLABUS**

#### Course name German language 2 [N1MiBP1>JN2]

Course				
Field of study Mechanical and Automotive Engineering		Year/Semester 2/4		
Area of study (specialization)		Profile of study general academic		
Level of study first-cycle		Course offered in niemiecki		
Form of study part-time		Requirements elective		
Number of hours				
Lecture 0	Laboratory classe 0		Other 0	
Tutorials 40	Projects/seminars 0	6		
Number of credit points 4,00				
<b>Coordinators</b> mgr Joanna Skrobała joanna.skrobala@put.poznan.pl		Lecturers		

#### **Prerequisites**

The already acquired language competence compatible with level B1 (CEFR) The ability to use vocabulary and grammatical structures required on the high school graduation exam with regard to productive and receptive skills The ability to work individually and in a group; the ability to use various sources of information and reference works.

## **Course objective**

Advancing students' language competence towards at least level B2 (CEFR). Development of the ability to use academic and field specific language effectively in both receptive and productive language skills. Improving the ability to understand field specific texts (familiarizing students with basic translation techniques). Improving the ability to function effectively on an international market and on a daily basis.

## Course-related learning outcomes

#### Knowledge:

Has extended basic knowledge necessary to understand specialist subjects and specialist knowledge about the construction, construction methods, manufacturing and operation of a selected group of working, transport, thermal and flow machines covered by the diploma path.

Has elementary knowledge of the life cycle of machinery, recycling of machine elements and construction and consumables.

Has elementary knowledge of the impact of machinery and technology on the natural environment and global energy balances.

Skills:

Can obtain information from literature, the Internet, databases and other sources. Can integrate the obtained information, interpret and draw conclusions from it, and create and justify opinions. Can use the following languages: native and international to a degree enabling the understanding of technical texts and writing with the use of dictionaries of technical descriptions of machines in their technical field (knowledge of technical terminology).

Can use in verbal communication one additional foreign language at the B2 level of the European System for the Description of Languages Education.

Social competences:

Is ready to recognize the importance of knowledge in solving cognitive and practical problems and to consult experts in case of difficulties in solving the problem on its own.

Is ready to initiate actions for the public interest.

Is willing to think and act in an entrepreneurial manner.

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows: Formative assessment: tests during academic year (written and oral), presentations Summative assessment: credit

## Programme content

Types of transport Mechanical engineering Mechatronic systems Fundamentals of electrical engineering

## **Course topics**

Rail, road, sea, air and intermodal transport Types of gears, characteristics and comparison, application and types of bearings - description and comparison, application National and international standards Components of machines Construction, examples and application of mechatronic systems Definition of basic electrical engineering concepts, reading of diagrams

## **Teaching methods**

work with texts, discussion, team work, translation, films, individual written and oral deliverance, individual meetings with students, homework analysis, Moodle platform exercises.

# Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,00
Classes requiring direct contact with the teacher	40	2,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	60	2,00
