

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Financial analysis and fundraising opportunities supporting circular economies [S1TOZ1>AFiMPFiPWGOZ]

Course

Field of study

Circular System Technologies

Year/Semester

1/2

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

full-time

Requirements

elective

Number of hours

Lecture

30

Laboratory classes

0

Other

0

Tutorials

0

Projects/seminars

0

Number of credit points

3,00

Coordinators

dr Krzysztof Kołodziejczyk

krzysztof.kolodziejczyk@put.poznan.pl

dr hab. Marek Szczepański prof. PP

marek.szczepanski@put.poznan.pl

Lecturers

Prerequisites

None.

Course objective

The aim of the course is to familiarize students with the methods and instruments of financial analysis of the company and the sources of financing of investment projects within circular economy.

Course-related learning outcomes

Knowledge:

student:

1. has knowledge of the development of ideas, goals, principles of operation and the organizational structure of the circular economy; knows the economic, economic and legal-administrative aspects of its functioning along with their interrelationships [k_w05].
2. knows the principles and methodology of economic evaluation of engineering activities [k_w16].

3. knows the general principles of creating and developing forms of individual entrepreneurship [k_w25].

Skills:

student:

1. selects methods of process control and quality assessment of raw materials, products and waste [k_u10].
2. analyzes and verifies the existing technical solutions in the field of closed-loop technology [k_u11].
3. using analytical, simulation and experimental methods, knows how to formulate assumptions and methods of their implementation for simple engineering tasks in the design and operation of installations used in closed-loop technologies [k_u22].

Social competences:

student:

1. supports the idea of a harmonious, global civilization and economic development, promoting the principles of a circular economy, sustainable development and rational management of natural environment resources on a local and global scale [k_k09].
2. understands the need to communicate to the society - incl. through the mass media - full information about the benefits and challenges related to the implementation of the circular economy concept [k_k11].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

1. Written test on theory and tasks during the last lecture.
2. During the semester, the material is repeated in the form of a selection test, e.g. the Kahoot test or on the Moodle platform.
3. Students who are particularly interested in the subject have the opportunity to deepen the chosen topic and methodology through a case study, prepared under the supervision of a lecturer.

Programme content

The program covers methods and instruments of financial analysis of an enterprise and the basics of circular economy, including sources of financing for investment projects within circular economy.

Course topics

1. Economic analysis in the enterprise (Essence, subject, classification and tasks. Stages of the analysis process).
2. Initial assessment of the company's financial condition (horizontal and vertical balance sheet analysis. Initial profit and loss account analysis).
3. Indicator analysis of the company's financial condition (profitability, financial liquidity, debt and operational efficiency).
4. Analysis of property assets.
5. Analysis of capital resources
6. The specific risk of companies implementing the idea of a circular economy.
7. Business models for an enterprise operating in circular economy.
8. Sources of financing for companies implementing the idea of circular economy.
9. Management accounting instruments that can support circular economies.
10. The role of bank guarantees in financing business ventures under circular economies.
11. Support programs for circular economy from public authorities.

Teaching methods

1. Lecture.
2. Case study.
