# POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

# **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

Vehicle emissions measurement [N2Trans1-TrN>PEP]

Course			
Field of study Transport		Year/Semester 2/3	
Area of study (specialization) Low-emission Transport		Profile of study general academic	
Level of study second-cycle		Course offered in Polish	
Form of study part-time		Requirements compulsory	
Number of hours			
Lecture 18	Laboratory classe 9		Other 0
Tutorials 0	Projects/seminars 0	3	
Number of credit points 3,00			
Coordinators prof. dr hab. inż. Jacek Pielecha jacek.pielecha@put.poznan.pl		Lecturers	

#### **Prerequisites**

Knowledge: student has a basic knowledge of carrying out research and exhaust emission measurements Skills: student is able to integrate the obtained information, to make their interpretation, draw conclusions, formulate and justify opinions Social competencies: student is aware of the non-technical aspects and effects of transport activities

## **Course objective**

Provide the basic information about the measurements of vehicles exhaust emission using the latest mobile solutions

## Course-related learning outcomes

Knowledge:

1. Has a basic knowledge concerning to the exhaust emission measurements from different types of vehicles

2. Has a basic knowledge about methods, techniques, tools and materials used for measuring exhaust emission from vehicles in real traffic conditions using mobile devices

3. Has a detailed knowledge about the types and methods of vehicles exhaust emission measurements

Skills:

1. Is able to use the analytical and experimental methods for formulating and solving problems associated with vehicles exhaust emission measurements

2. Is able to identify and formulate the specification of complex engineering tasks specific to the vehicles exhaust emission measurements

3. Is able to propose exhaust emission indexes for specific vehicle measurement tests

4. Is able to plan and carry out experimental research in the field of vehicle exhaust emission measurements in real traffic conditions

Social competences:

- 1. Understands the need for continuous training(raising the professional and personal competences
- 2. Is able to creative and enterprising thinking and acting
- 3. Has a sense of responsibility for collaborative performed tasks related to teamwork -

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows: Discussion with illustrative materials use, related with measurement of exhaust emission in transport tasks. The written exam

## Programme content

ssues connected with control tests in European Union and Unated States of America. Control tests of vehicles in case of gaseous compounds exhaust emission. Road tests of cars and trucks equipped with SI and CI engines. Ability to assess fuel consumption using a two-dimensional probability density histograms. Rating emissivity of different propulsion systems including hybrid and start-stop systems Vehicle emission measurements during real operation, using a mobile analyzer (measurement of gaseous components and the particulates? Qualitative and quantitative assessment. Carrying out exhaust emission research from engines fueled with different types of fuels (gasoline, diesel, gas) on engine test beds. Determination of exhaust emission histograms defining operation conditions of vehicles and their engines. Determination of emissivity vehicle under different conditions. Determination of brake specific emission from vehicles in actual and future homologation tests. Evaluation of the exhaust emission from vehicles with different mileage. Methodology for vehicle exhaust emission assessement in real traffic conditions using data from the vehicle"s diagnostic system

## **Course topics**

none

## **Teaching methods**

seminar lecture / lecture with multimedia presentation, laboratory

## Breakdown of average student's workload

	Hours	ECTS
Total workload	77	3,00
Classes requiring direct contact with the teacher	27	1,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	50	2,00
