

#### POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

#### **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

German [S1ZiIP2>JN1]

Course

Field of study Year/Semester

Management and Production Engineering 1/2

Area of study (specialization) Profile of study

general academic

Level of study Course offered in

first-cycle Polish

Form of study Requirements

full-time elective

**Number of hours** 

Lecture Laboratory classes Other

0 0

Tutorials Projects/seminars

60 0

Number of credit points

5,00

Coordinators Lecturers

# **Prerequisites**

The already acquired language competence compatible with level B1 (CEFR) The ability to use vocabulary and grammatical structures required on the high school graduation exam with regard to productive and receptive skills The ability to work individually and in a group; the ability to use various sources of information and reference works.

0

# Course objective

Advancing students' language competence towards at least level B2 (CEFR). Development of the ability to use academic and field specific language effectively in both receptive and productive language skills. Improving the ability to understand field specific texts (familiarizing students with basic translation techniques). Improving the ability to function effectively on an international market and on a daily basis.

# Course-related learning outcomes

# Knowledge:

As a result of the course, the student ought to acquire field specific vocabulary related to the following issues: - Materials - Manufacturing engineering and to be able to define and explain associated terms, phenomena and processes.

Skills:

As a result of the course, the student is able to: - give a talk on field specific or popular science topic (in German), and discuss general and field specific issues using an appropriate linguistic and grammatical repertoire, - express basic mathematical formulas and to interpret data presented on graphs/diagrams, - formulate a text in German where he/she explains/describes a selected field specific topic.

#### Social competences:

As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in German. The student is able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

# Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows: Formative assessment: tests during academic year (written and oral), presentations Summative assessment: credit.

Assignment of grades to percentage ranges of results: <90-100> very good; <80-90) good plus; <70-80) good; <60-70) satisfactory plus; <50-60) satisfactory; <0-50) unsatisfactory.

# Programme content

Describing and analyzing statistics and mathematical operations. Materials Production methods

# Course topics

Classification of materials, material properties Chip machining, bonding, forming - features, application, comparison

# **Teaching methods**

work with texts, discussion, team work, translation, films, individual written and oral deliverance, individual meetings with students, homework analysis, Moodle platform exercises.

# **Bibliography**

#### Breakdown of average student's workload

	Hours	ECTS
Total workload	125	5,00
Classes requiring direct contact with the teacher	60	2,50
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	65	2,50
