

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Quality management [S2Bud1E-IPB>ZJ]

Course

Field of study

Civil Engineering

Year/Semester

1/2

Area of study (specialization)

Construction Engineering and Management

Profile of study

general academic

Level of study

second-cycle

Course offered in

English

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

15

Laboratory classes

0

Other

0

Tutorials

15

Projects/seminars

15

Number of credit points

3,00

Coordinators

dr hab. inż. Jerzy Paślawski prof. PP
jerzy.paslowski@put.poznan.pl

Lecturers

Prerequisites

The student has basic knowledge of the basics of construction and the subject of quality management; The student is able to obtain information from the indicated sources and analyze engineering activities undertaken; The student is aware of the need to constantly update and supplement construction knowledge and take responsibility in professional work; The student is aware of the issues of management in construction

Course objective

Learning and expanding knowledge of the basic principles of construction in the aspect of quality, management in construction in the aspect of implementation of a construction project in terms of quality. Sensitizing the student to practical aspects of quality management in construction.

Course-related learning outcomes

Knowledge:

Have detailed knowledge on business activity in construction industry and the ways of developing different forms of individual entrepreneurship; understand the principles of enterprise financial economy.

Have detailed knowledge in the field of operation algorithms of selected software supporting the analysis and design of building facilities, which are also useful to plan and manage construction projects, including Building Information Modelling (BIM).

Know in detail the rules of developing the procedures of construction project quality management; have knowledge of the effectiveness, costs and timing of construction projects under risk and uncertainty conditions..

Skills:

Are able to prepare an introductory economic analysis of proposed solutions and undertaken engineering activities; can prepare a cost calculation and a work schedule, contract and business plan of a building project; are able to manage building processes, define duties and tasks in investment and building control.

Are able to prepare an introductory economic analysis of proposed solutions and undertaken engineering activities; can prepare a cost calculation and a work schedule, contract and business plan of a building project; are able to manage building processes, define duties and tasks in investment and building control.

Can estimate hazards of building projects and building operation, implement suitable safety rules and prepare work standards as well as quality management procedures. .

Social competences:

Can realise that it is necessary to improve professional and personal competence; are ready to critically evaluate the knowledge and received content..

Understand the need to transfer to the society the knowledge about building engineering, transfer the knowledge in a clear and easily comprehensible manner.

Are ready to think and act in a business-like way.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

As a form of measuring / assessing student work, a final test is carried out (during the last class)

Grade scale determined% from:

90 very good (A)

85 good plus (B)

75 good (C)

65 sufficient plus (D)

55 satisfactory (E)

below 54 insufficient (F)

Programme content

Lecture 1 - Introduction

Lecture 2 - Quality management

Lecture 3 - Aspects of quality management

Lecture 4 - Examples in construction

Lecture 5 - Quality management methods

Lecture 6 - Examples of flexibility in quality

Lecture 7 - Practical aspects of quality management in construction

Lecture 8 - Credit

Exercises 1 - Introduction

Classes 2 - Simulation quality

Exercises 3 - Simulation quality II

Exercises 4 - Simulation quality III

Exercises 5 - Simulation quality IV

Classes 6 - Simulation quality - summary

Exercises 7 - Simulation quality - overview

Exercises 8 - Credit

Project 1 - Introduction

Project 2 - Project overview

Project 3 - Project overview II

- Project 4 - Project overview III
- Project 5 - Consultation
- Project 6 - Consultation II
- Project 7 - Consultations III
- Project 8 - Credit

Course topics

Lectures

1. Introduction
2. Basics of Quality Management
3. Development of Quality Engineering
4. The Views of Deming, Juran, and Crosby
5. Teamwork, Quality Management Tools, and the Quality Management System
6. Organizational Culture, Employee Engagement, Communication
7. Practical Aspects of Quality Management

Teaching methods

Pyramid discussion; Panel discussion; The classic problem method; Teaching games; Exchange of ideas; Informative lecture; Problem lecture; Conversational lecture; Program text; Work with a book; Talk; Lecture reading; Demonstration method; Production exercise method; Method of experiments; Observation and measurement method; Project method; Leading text method; Workshop method; Show.

Bibliography

Basic

1. Hamrol A. Zarządzanie jakością z przykładami, Wydawnictwo Naukowe PWN, Warszawa 2005, 2008
2. Eckers G. Rewolucja Six Sigma ? jak General Electric i inne przedsiębiorstwa zmieniały proces w zyski, Akademia Białego Kruka, MT Biznes, Warszawa 2010

Additional

1. Myszewski J. PO PROSTU JAKOŚĆ. PODRĘCZNIK DO ZARZĄDZANIA JAKOŚCIĄ, , 2009
2. Barriers in running construction SME?case study on introduction of agile methodology to electrical subcontractor

Breakdown of average student's workload

	Hours	ECTS
Total workload	90	3,00
Classes requiring direct contact with the teacher	45	1,50
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	45	1,50
