COURSE DESCRIPTION CARD - SYLLABUS

Course name
English [S2Elenerg1>JA]

Course

Field of study
Electrical Power Engineering

Year/Semester
1/1

Area of study (specialization)
Renewable Sources and Storage of Energy

Profile of study
general academic

Level of study
second-cycle

Course offered in
Polish

Form of study
full-time

Requirements
elective

Number of hours

Lecture
0

Laboratory classes
0

Other
0

Tutorials
30

Projects/seminars
0

Number of credit points

2,00

Coordinators

mgr Hanna Nowak
hanna.nowak@put.poznan.pl

mgr Zuzanna Drajerczak
zuzanna.drajerczak@put.poznan.pl

Lecturers

Prerequisites

Language competence compatible with level B2 (CEFR) ; knowledge of selected field-specific (energy) vocabulary; ability to use various sources of information. Readiness to follow group work rules and to work in a team.

Course objective

To develop the student's ability to use academic and field-specific (energy) language effectively in speech and writing, in a number of complex tasks. To develop the student's ability to analyze critically field-specific texts. To encourage build-up of field-specific vocabulary.

Course-related learning outcomes

Knowledge:
the student understands the differences between written and spoken forms of english. the student has acquired field-specific vocabulary related to renewable energy sources and sustainable growth, smart

and environmentally-friendly solutions - smart home, passive house, modern cars.

Skills:
the student is able to write an email, an abstract of their diploma thesis, a summary of a scientific article, using an appropriate linguistic and grammatical repertoire. the student is able to give a talk on a field-specific or popular science topic, and discuss general and field-specific issues, analyzing constraints and feasible solutions. the student is able to understand and analyze international, field-specific literature, assess the merit of resource materials, and use incomplete/partially unreliable resources.
the student is able to participate in a discussion on a field specific/professional topic, using "ad rem" arguments.

Social competences:
the student is able to communicate effectively in general and field-specific areas, and communicate in english in public.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:
Regular assessment of in-class performance and home assignments : individual and/or group presentations, written tasks. One 60 minute-long written quiz featuring a battery of tests. Successful completion of assignments as above and a 50% score on the quiz are required to obtain a pass.

Programme content

Writing abstracts and summaries. Group presentations.
Traditional and modern technologies of generating and storing electrical energy
Smart solutions: smart home, passive house, modern vehicles.
Environmental issues
Occupational Health andSafety

Course topics

Writing abstracts and summaries
Group presentations.
Traditional and modern technologies for harnessing energy sources and generating electrical energy
Energy storage
Smart home
Passive house
Modern vehicles
Environmental issues, climate change,sustainable development
Occupational Health and Safety.

Teaching methods

Classroom activities guided by the communicative approach, using mulimedia

Breakdown of average student's workload

	Hours	ECTS
Total workload	55	2,00
Classes requiring direct contact with the teacher	30	1,00
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	25	1,00
