

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Specialist english language [N2EPIO1>JAS]

Course

Field of study

Industrial and Renewable Energy Systems

Year/Semester

2/3

Area of study (specialization)

Thermal and Renewable Energy

Profile of study

general academic

Level of study

second-cycle

Course offered in

Polish

Form of study

part-time

Requirements

compulsory

Number of hours

Lecture

0

Laboratory classes

0

Other

0

Tutorials

10

Projects/seminars

0

Number of credit points

1,00

Coordinators

Lecturers

Prerequisites

Language competence compatible with level B2+ (CEFR) ; knowledge of selected field-specific (energy) vocabulary; ability to use various sources of information. Readiness to follow group work rules and to work in a team.

Course objective

Development of the ability to use academic and field specific language effectively in both receptive and productive language skills. Improving the ability to understand field specific texts and basic translation techniques. Improving the ability to function effectively on an international market, in a company and in everyday life.

Course-related learning outcomes

Knowledge:

knows the rules of using english for the energy sector in speech and writing.

knows specialist english vocabulary and phrases used in communication in the area of study.

Skills:

is able to communicate on specialized topics related to the energy sector with diverse audiences.

is able to use english at b2 + level (cefr) and specialized terminology related to the broadly understood

energy sector.

is able to obtain information from literature, databases and other properly selected sources in english, and critically evaluate them.

is able to describe a process, write a report, specification, evaluation

Social competences:

is ready to critically assess his or her language skills, especially in the field of energy.

is ready to initiate activities to broaden the knowledge of specialist english for industrial and renewable energy.

is ready to perform professional roles responsibly and communicate effectively in work environment.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:

Regular assessment of in-class performance and home assignments, presentation or project, written tasks. One 50 minute-long written quiz. Successful completion of assignments as above and a 50% score on the quiz are required to obtain a pass.

Programme content

Writing a report, specification, project/employee evaluation, instructions. Topics: Innovations in oil and gas drilling. New technology spin-offs. Carbon-free steelmaking. Emergencies. Seawater desalination, desert water system. Most promising solutions in renewable energy.

Course topics

General topics: Interpreting and describing graphs

Preparing reports, specifications, project and/or employee evaluations, instructions, and diagrams.

Topics: Innovations in oil and gas extraction.

The phenomenon of by-products of new technologies.

Carbon-free steel production.

Emergency situations and accidents - hydroelectric power plants.

Seawater desalination, desert water systems.

The most promising renewable energy solutions.

Teaching methods

Classroom activities guided by the communicative approach, using multimedia
