

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Specialized German language [S2FT2>JNS]

Course

Field of study

Technical Physics

Year/Semester

1/2

Area of study (specialization)

–

Profile of study

general academic

Level of study

second-cycle

Course offered in

Polish

Form of study

full-time

Requirements

elective

Number of hours

Lecture

0

Laboratory classes

0

Other

0

Tutorials

30

Projects/seminars

0

Number of credit points

2,00

Coordinators

mgr Joanna Skrobala

Lecturers

Prerequisites

The already acquired language competence compatible with level B2 (CEFR) The ability to use vocabulary and grammatical structures required on the first level of studies The ability to work individually and in a group; the ability to use various sources of information and reference works.

Course objective

Advancing students' language competence towards at least level B2+ (CEFR). Development of the ability to use academic and field specific language effectively in both receptive and productive language skills Improving the ability to understand field specific texts (familiarizing students with basic translation techniques). Improving the ability to function effectively on an international market and on a daily basis.

Course-related learning outcomes

Knowledge:

as a result of the course, the student ought to acquire field specific vocabulary related to the following issues: - qualifications and competences in the workplace.

- applying for jobs and to be able to define and explain associated terms, phenomena and processes.

Skills:

as a result of the course, the student is able to:

- give a talk on field specific or popular science topic (in german), and discuss general and field specific issues using an appropriate linguistic and grammatical repertoire,
- formulate a text in german where he/she explains/describes a selected field specific topic on the basis of literature and other sources of information, including internet sources, and present it orally .
- prepare and present in the native language and in german an oral presentation, a scientific study on specific issues in the field of computer science, materials engineering and technology.
- educate himself and identify directions for further learning.

Social competences:

as a result of the course, the student is able to: - understand the need for lifelong learning

- communicate effectively in a field specific/professional area, and to give a successful presentation in german.
- recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

Methods for verifying learning outcomes and assessment criteria
