

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Preparation of diploma thesis [S1IBio1E>PPD]

Course

Field of study

Biomedical Engineering

Year/Semester

4/7

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

English

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

0

Laboratory classes

0

Other

0

Tutorials

0

Projects/seminars

60

Number of credit points

13,00

Coordinators

dr inż. Jakub Grabski
jakub.grabski@put.poznan.pl

Lecturers

Prerequisites

The student has the knowledge and skills necessary to complete the diploma dissertation acquired during classes in semesters 1-7

Course objective

Expanding knowledge and skills on solving engineering problems in biomedical engineering and the ability to present the results of these works.

Course-related learning outcomes

Knowledge:

The student has basic knowledge of biomedical engineering problems - theoretical foundations, tools and means used to solve engineering problems.

Skills:

The student can obtain information from various sources, also in English, and integrate, interpret and critically assess obtained information, draw conclusions as well as formulate and justify opinions, The student can use analytical, simulation and experimental methods to formulate and solve

engineering tasks and simple research problems in biomedical engineering.

Social competences:

The student is able to set priorities for implementation of a task set,

The student understands the importance of lifelong learning,

The student is aware of social role played by a graduate of technical university and understands the necessity to formulate and provide to the public, especially by means of mass media, information and opinions concerning technological advancements and other aspects of engineering activities; makes an effort to convey information and opinions in such a way that can be commonly understood

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Completion of the course based on:

- assessment of the diploma thesis presented,
- regularity of its implementation,
- ability to independently technical problem solving skills.

Programme content

Compatible with the topic of the diploma thesis.

Course topics

none

Teaching methods

Discussion with the student about problems occurring during diploma thesis preparation, solving research problems or providing sources in the literature to solve problems.

Bibliography

Basic:

Scientific and technical literature necessary to prepare the thesis

Additional:

-

Breakdown of average student's workload

	Hours	ECTS
Total workload	325	13,00
Classes requiring direct contact with the teacher	60	2,50
Student's own work (literature studies, preparation for laboratory classes/ tutorials, preparation for tests/exam, project preparation)	265	10,50
