Lecturers

Prerequisites

When starting this course, the student should have basic knowledge of the economics and organization of transport and should know the principles of operation of a transport company as well as know the rules of shipping management (also international). I should know the basics of civil law, tax law and insurance rules in road transport. He should also have the ability to obtain information from the indicated sources and be ready to cooperate as part of the team.

Course objective

The aim of the course is to provide students with basic knowledge in the field of access to the profession and the carrier market. During the course, students learn about the structure and principles of the organization of the road carrier market in the transport of people and goods.

Course-related learning outcomes

Knowledge:

1. Student knows extended issues in the field of access to the profession and market of a road transport carrier [P7S_WG_07]
2. Student knows the conditions of the functioning of companies as participants of the transport market

and the strategies of their functioning [P7S_WK_02]

3. Student knows the phenomena and modern trends characteristic for the profession of the carrier and the transport market, knows the detailed issues and methods of managing a transport company [P7S_WK_03]

4. Student knows the best practices in the profession of carrier and transport market and related specific issues [P7S_WK_04]

Skills:

1. Student is able to communicate using properly selected means in the professional environment of carriers and in other environments within the framework of road transport and specific issues related to them, and is able to manage transport in the logistics supply chain [P7S_UW_02]

2. Student is able to formulate and solve tasks through the interdisciplinary integration of knowledge from the fields and disciplines used to organize transport in the designed logistic systems [P7S_UO_01]

3. Student is able to identify changes in requirements, standards, regulations, technical progress and the reality of the labor market, and on their basis determine the need to supplement his own and other knowledge [P7S_UU_01]

Social competences:

1. Student notices the cause-and-effect relationships in the implementation of the set goals and make a gradation of significance of alternative or competitive tasks [P7S_KK_01]

2. Student is able to plan and manage in a creative way business ventures [P7S_KO_01]

3. Student is aware of the responsibility and initiation of activities related to the formulation and transfer of information and cooperation in the society in the field of logistics [P7S_KO_02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: The knowledge acquired in the scope of the lecture is verified by means of an examination in the form of a test consisting of 50 closed multiple-choice questions. The exam is passed after obtaining a minimum of 60% of the points.

Tutorial: pass based on the result of the final test in the form of a test with multiple-choice closed questions - 25 questions - after obtaining a minimum of 60% of points and active participation in classes.

Project: credit based on the evaluation of the implemented project, after obtaining 60% of points.
