

COURSE DESCRIPTION CARD - SYLLABUS

Course name

E-learning training [S1Lot2>SELearn]

Course

Field of study

Aviation

Year/Semester

1/1

Area of study (specialization)

–

Profile of study

general academic

Level of study

first-cycle

Course offered in

Polish

Form of study

full-time

Requirements

compulsory

Number of hours

Lecture

2

Laboratory classes

0

Other

0

Tutorials

0

Projects/seminars

0

Number of credit points

0,00

Coordinators

dr inż. Anna Kobaszyńska-Twardowska

Lecturers

Prerequisites

The student should possess basic skills in using a computer, navigating an e-learning platform, and using the Internet.

Course objective

Providing students with basic information about the organization of work on e-learning platforms and digital systems of Poznan University of Technology.

Course-related learning outcomes

Knowledge:

The student, using library resources, understands how library collections are organized and is familiar with basic concepts related to copyright protection, information security, and intellectual property rights.

Skills:

The student is able to independently search for necessary informational materials, use the online catalog of the Poznan University of Technology Library, as well as other library catalogs, databases, and

the Internet.

The student can operate a computer and basic software.

Social competences:

The student is aware of the creation and existence of national and global Internet resources, databases, repositories, and data collection systems. The student is aware of the responsibility for actions taken on the Internet.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Assessment of whether the student is able to properly use e-learning tools and understands the rules of using the Internet.

Programme content

1. General information on the use of Internet resources.
2. Electronic systems of Poznan University of Technology.
3. E-learning platforms.
4. Sample artificial intelligence tools.
5. Legal regulations concerning responsibility for actions committed on the Internet.

Course topics

Presentation of possibilities for implementing educational programs using modern IT tools.

Teaching methods

Subject exercises: multimedia presentation.
