

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Business and financial management of transport company [N2Trans1-TrD>DGiZFPT]

Course

Field of study

Transport

Year/Semester

2/3

Area of study (specialization)

Road Transport

Profile of study

general academic

Level of study

second-cycle

Course offered in

Polish

Form of study

part-time

Requirements

compulsory

Number of hours

Lecture

9

Laboratory classes

0

Other

0

Tutorials

9

Projects/seminars

0

Number of credit points

2,00

Coordinators

dr hab. inż. Jakub Kowalczyk

Lecturers

Prerequisites

The student has a general knowledge of the rules governing business activities in the field of road transport. The student should demonstrate a general ability to identify problems related to financing the business activity. The student is willing to deepen the knowledge of interdisciplinary subjects. The student is open to learning about new solutions related to the subject of education.

Course objective

The aim of the course is to familiarize students with the principles of a transport business, particular in financial aspects - in the area of financing activities, obtaining project funds, budget planning, invoicing, planning and applying price lists and applying tax law. An additional goal is to obtain knowledge in accordance with Annex I to the Regulation (ec) no 1071/2009 of the European Parliament and of the Council of 21 October 2009 establishing common rules concerning the conditions to be complied with to pursue the occupation of road transport operator and repealing Council Directive 96/26/EC with regard to modules D and E.

Course-related learning outcomes

Knowledge:

The student knows the economic, legal and other conditions of the operation of transport companies. The student has a basic knowledge of managing / running a business and an individual entrepreneurship.

Skills:

The student is able to obtain information from literature, databases and other sources (in Polish and English), integrate it, interpret and critically evaluate it, draw conclusions, formulate and exhaustively justify opinions.

The student is able to define the directions of further learning and implement the process of self-education, including other people.

Social competences:

The student understands that in the field of transport engineering, knowledge and skills very quickly become obsolete.

The student understands the importance of popularizing activities regarding the latest achievements in the field of transport engineering.

The student is aware of the need to develop professional achievements and to comply with the rules of professional ethics.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Credit in terms of lecture.

In terms of exercises - activity during the class and a final colloquium will be assessed.
