

## **Business Analyst Internship**

WhatClinic.com is offering an internship for Business Analyst to join our Clinic Organization based in Dublin. The Clinic Organization is responsible for the acquisition of new Clinics to advertise in our site, business strategy and revenue growth. Working on this internship will help you to develop further his/her data analysis skill, and his/her business acumen. You will provide quantitative support, market understanding and a perspective to our sales organization. As a data-loving member of the team, you serve as data expert for the team, using numbers to help them make better decisions, communicating your findings to a team leader the next.

This role would suit a Data Lover that can see different angles of a product or business opportunity, and you know how to connect the dots and interact with people in various roles and functions. You have good knowledge with analytical tools and techniques, and bring a skill-set in analyzing data and communicating recommendations. You will deepen your skill-set by working with the senior managers and VPs of WhatClinic.

WhatClinic.com is a fast growing company and you will work with the finest of innovators in one of the best locations in our HQ in the heart of Dublin city just of Grafton Street. It is definitely a fun, fast paced environment, changing and growing with great opportunities to both challenge you and progress your career.

### **Responsibilities:**

- Deep dive analyses of data to influence business decisions.
- Report on Sales's Key Performance Indicators (KPIs) .
- Identification of key market drivers and areas of opportunity for the business
- Own tracking and reporting for focus markets.

### **Desired Skills**

- Maths / Science / Statistics for Business degree
- Excellent communication skills, fluent written and spoken English
- Experience with SQL and one or more technical languages
- Self-motivated who can self-direct work in an unstructured environment
- Eager to learn and to create impact in WhatClinic
- Familiar with DB structures, CRM systems or Google Analytics
- Tableau Software
