

M.Sc. Programmes

Product Engineering

Field of study: Mechanical and Automotive Engineering

Programme description

The course is intended for mechanical engineers who want to broaden their education on issues connected with managing an industrial product in its whole life cycle, starting from design and finishing in disposal (cradle to grave approach). Environmental, economic and social impacts of any products' existence must all be considered in a path to create goods suitable for future, sustainable economy.

Everything that is available at the global market, both goods and services, is also a subject to the global competition. Therefore, a strong focus in the course is put on the marketing approach to a product, understanding that not only technical requirements stated by potential customers are the source of a products' market status but also interdisciplinary multi-aspect thinking is necessary in the work of a successful product manager.

Faculty of Civil and Transport Engineering offers a unique study programme aimed at educating engineers for the needs of sustainable economy. The Faculty has long-lasting experience in teaching and high scientific potential in means of qualified staff and exceptional research equipment. Adding to this the ongoing cooperation with the best European educational and R&D institutions, it all provides with conditions for high quality technical education.

Course summary:

Semester 1

- Analytical mechanics
- Applied mathematics
- Modern physics issues
- Technical thermodynamics
- Programming languages
- Foreign language
- Business processes management
- Surface engineering
- Modern engineering materials
- Strength of mechanical constructions
- Ecological evaluation tools (LCA)
- Ecotechnologies
- Marketing
- Foundations of innovation
- Internship
- Management skills training

Semester 2

- Fluid mechanics
- Quality engineering
- Foreign language
- Modeling of mechanical systems
- Computer aided design (CAD)
- Machine technology
- Lubricants and fuels
- Services engineering
- Intellectual property and customer protection
- Life Cycle Management (LCM)
- Ecodesign
- Interim paper
- Proseminar

Semester 3

- Innovative entrepreneurship
- Finances management
- Ergonomy and security
- Modern management systems
- Project management
- Life Cycle Costing (LCC)
- Corporate culture and communication
- Diploma seminar

M.Sc. Programmes

Product Engineering

Field of study: Mechanical and Automotive Engineering

University	Poznan University of Technology Poznan, POLAND	
Degree to be obtained	Master of Science	
Programme website	https://www.put.poznan.pl/en	
Contact	International Relations Office Pl. M. Skłodowskiej-Curie 5 60-965 Poznan, Poland	1
Phone	+48 61 665 3544	T
Fax	+48 61 665 3956	
E-mail	study@put.poznan.pl	
Language of instruction	English	
ECTS points	90	
Duration	1.5 years (3 semesters)	
Programme begins	end of February	
Programme ends	end of June	
Deadline for application	3 months before the course starts – end of November	
Education requirements	English language – level B2 (Common European Framework), Bachelor's degree or its equivalent in engineering or applied sciences, with a qualification in mechanical engineering. Full list of the required documents is available at: https://www.put.poznan.pl/en	
Mode of instruction	Lectures, classes, laboratory classes, projects, workshops, internships
